Prepare for a literary sensation as debut author Kristie Wolf launches the "Project VIPER Series" with "Too Dangerous to Love." In this thrilling romantic suspense novel, readers are thrust into a world where Navy SEAL Chris Daviani, a true hero with a weaponized bionic arm courtesy of Project VIPER, is far too dangerous to love. But when he's tasked with protecting the brilliant Dr. Scarlett Kerrigan, who unravels a perilous threat to VIPER's existence, their lives entwine in a battle against danger and desire.

Set against the backdrop of bionic soldiers, "Too Dangerous to Love" offers a unique twist on the romantic suspense genre. Chris Daviani is not just a soldier; he's a super soldier, and Scarlett Kerrigan is not just a genius; she's a woman longing for a chemistry that defies the boundaries of science.

Wolf's debut novel delves deep into the human experience, exploring love, resilience, and the undeniable pull of attraction between two individuals who refuse to let their past define their future.
