

## Too Dangerous To Love Project VIPER Book 1

### Short Blurb:

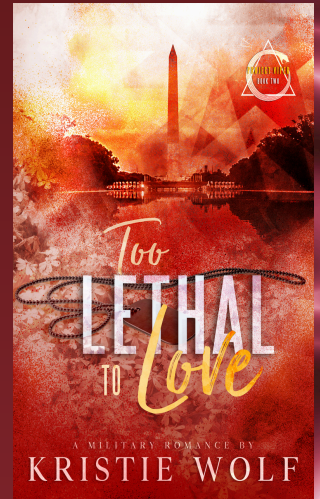

He lost his arm to the enemy. The military gave him a weaponized one. Now he's stronger, smarter, and much too dangerous to fall for the shy scientist who helped turn him into a super soldier. The problem is, underneath the science, he's still all man.

### Long Blurb:

He thinks he's too dangerous to love. Navy SEAL Chris Daviani lost his arm in action. Project VIPER gave him a bionic one. Now he's stronger, deadlier, and much too dangerous to even think about the shy genius who turned him into the military's first super soldier. He should focus on keeping her alive while she uncovers a dangerous threat to VIPER's existence, not on drawing out the sultry woman she's buried deep inside. The flaw in his strategy? Underneath the science that's made him a human weapon, he's still a hot-blooded man. She thinks the only thing desirable about her is her brain. The men in Dr. Scarlett Kerrigan's life have never valued more than her brilliant mind. The dark, intense SEAL is no exception. He needs her to save VIPER - and his career - but his scorching gaze makes her burn for the type of chemistry she didn't learn in boarding school. The problem is, her extensive education didn't cover how to guard her heart against her alpha bodyguard who thinks his past has sentenced him to a life alone. The solution? Even her brilliant mind can't figure that out.

## Too Lethal To Love Project VIPER Book 2

### Short Blurb:

He's a human weapon who thinks he's too lethal to love. She thinks falling for her is a ticket to the morgue. They'll both be dead by Christmas if they don't prove each other wrong.

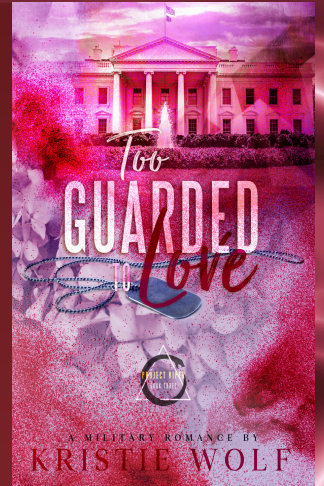

### Long Blurb:

Lieutenant Kane Darren lives by one rule: serve first, love later. His allegiance is to Project VIPER, the top-secret military program that turned him into a super soldier. Now his bionic body and his mind are deadly weapons, but that's not why he can't chance falling in love. Enter the snarky scientist who shines brighter than a Christmas tree. He should stand down and let one of his teammates protect her since she doesn't like him anyway. Well, too bad. Her vacation plans now include him. He'll need a holiday miracle, though. Not to stop the threat, but to protect her from himself. Kane thinks he's invincible. Against a drug cartel, he likely is. But the rugged cowboy with the superpowers and the sexy twang doesn't stand a chance against Dr. Beth Parker and her deadly curse. She should be worried about the threat to her life, not the blazing chemistry she can't deny, but the proof is in the graveyard. Loving her is a ticket to the morgue. She can't let Kane be her next victim, even if protecting him puts her life at risk.

## Too Guarded To Love Project VIPER Book 3

### Short Blurb:

He's a bionic soldier who thinks he's too guarded to love. She's a threat to his defenses, but falling for his teammate's sister could have consequences more dangerous than the enemy trying to kill her.

### Long Blurb:

Army Captain Nic Romero fears one thing: consequences. Losing an arm and a leg in battle because he trusted the wrong woman was brutal enough. Now he has a second chance at his military career with Project VIPER, the classified program that transformed him from a wounded warrior into an elite fighting machine. This time, his walls are as impenetrable as his bionic body. But a blazing encounter at the beach with a secretive siren threatens his defenses. His only focus should be protecting her from a deadly threat. Problem is, her safety isn't the only hard part of this mission. He's already experienced the thrill of her addictive heat. Another hit could trigger consequences more dangerous than the enemy. Dr. Olivia Darren never meant for her overprotective brother to find out she seduced his VIPER teammate. But thanks to the trouble tailing her, one night with playboy Nic Romero has morphed into a fever dream. Now she's entangled in a classified world of secrets and shadows with Nic assigned as her protector. His constant presence screams danger, his touch feels like a dare, and the powerful feeling that she's destined to repair his wounded heart won't retreat. She doesn't belong in his perilous world but try telling that to her heart that may have finally found where it belongs.

# Knife To The Heart Blood Snow Book 1

## Short Blurbs:

When she's the FBI agent trying to stop a killer in a Colorado ski town, but he's the hometown hero who thinks he's the one with the badge.

## Long Blurb:

All she wanted was a relaxing vacation in the tranquil ski-town of Red Snow, Colorado. But everything freezes for FBI Special Agent Rosalie Zenner when she spots an all-too-familiar deadly threat lurking in the mountain village. Duty-bound to ensure everyone's safety, she must stop a battle-hardened doctor with a reckless plan. Dr. Cannon Ford, the small town's selfless hero, is ready to pay any price to fulfill a life-saving promise, even negotiating with a criminal. But when the stunning FBI agent tries to prevent him from protecting his community, he's hit with a snow-melting attraction. Caught between the monster from her past and the rugged, possessive doctor determined to make her leave, Rosalie refuses to let the explosive passion between her and Cannon compromise her oath to catch a killer. While Cannon may not hold a badge, he's willing to take lives to save everyone he holds dear, including the woman who's ensnared him. As blood stains the icy trails, Cannon and Rosalie navigate impossible choices more perilous than the killer's chilling plans. One wrong move could lead to a fate worse than a Knife to the Heart. Welcome to Red Snow, where heroes emerge from the shadows, and love and danger entwine on every snowy slope.
